

**Dinner Meeting Presentation**

**October 19, 2011 (Wednesday)**

**“Alberta Infrastructure’s Value Management Program”**

Presented by

**Jay Sagoo, PEng, MBA, CCE, AVS**  
Cost Models/Parametrics Engineer, Alberta Infrastructure

Value Management is a powerful analytical tool that will help ensure the success of any project, process or product. Value Management involves a prescribed set of procedures, a trained facilitator and a multi-disciplined team to analyze the functional requirements of a project, product or concept. The use of VM achieves the essential functions at the lowest total cost over the life of the project without sacrificing utility, function or performance.

Alberta Infrastructure has endorsed the use of Value Management in its successful practice towards capital projects over many years.

Jay Sagoo, Cost Engineer with Alberta Infrastructure, will provide an overview of Alberta Infrastructure’s Value Management program, and its impact towards finding value towards capital projects.

Jay Sagoo is a Cost Engineer with Alberta Infrastructure. One of his responsibilities is to lead and coordinate Alberta Infrastructure’s Value Management program. Jay is a Professional Engineer (P.Eng.) and holds a Bachelor’s Degree in Engineering, as well as an MBA. He is a Certified Cost Engineer (CCE), as well as an Associate Value Specialist (AVS). His fourteen-year experience spans over government, utilities, and the manufacturing sector.

**EVERYONE IS INVITED TO ATTEND FOR THIS VERY INFORMATIVE TOPIC.**

---
