

CAREER OPPORTUNITY

Project Controls Specialists - Edmonton

Tracer Industries is now accepting applications for Project Controls Specialists.

Our Company

Tracer Industries is the largest heat management specialist worldwide. We are a subsidiary of Tyco International Limited, publicly traded on the NYSE (TYC), a diverse global company with annual revenues over \$17 billion that operates in over 60 countries and employs over 100,000 people. Our company is part of Tyco Thermal Controls (TTC), a global leader in integrated heat tracing, insulation, electrical and instrumentation products and services.

Tracer Industries is the main EPC (Engineering, Procurement, and Construction) service provider for TTC. We pride ourselves on delivering optimized designs and field services that provide electrical heat tracing solutions for piping freeze protection, process flow maintenance and vessel/instrumentation heating. We deal with many types of industrial projects, predominately in the oil and gas sector. Through our proven turn-key expertise, we provide quality service in all areas from engineering to manufacturing to installation and maintenance. Our dedication to software and process innovations keep us consistently at the forefront of this ever-evolving industry.

Our Culture

Tracer Industries is a vibrant and close-knit community of engineers and technologists who know that a successful workplace is one that balances a fun, comfortable atmosphere with a commitment to industry excellence. As a company we foster growth through personal and professional development. We have ongoing initiatives and involved social committees dedicated to further developing company culture. At Tracer, you can explore a variety of career opportunities in an energetic environment where respect and humility create clear and open lines of communication between all organizational levels.

Your Role

You will help develop planning, cost management and controls systems for turn-key EHT projects. As part of the Project Controls team, you will conduct estimate analyses and earned value reporting to develop and track project budgets and schedules. Other responsibilities will include:

- Developing and maintaining project budget/schedules based on the estimate analysis, the work breakdown structure, and regular productivity/progress updates
- Using Primavera, databases, Excel, SAP and analytical processes to create and update budgets and schedules.

- Contributing to the success of the Project Controls team through regular progress reporting including cost updates analyzing expended cost vs. budgeted cost and project forecasts using material takeoffs and labor productivity.
- Dedicating yourself to surpassing the needs and expectations of the client and Tracer management, while pursuing innovative ways to do so.
- Ensuring progress, budgeting and scheduling are properly aligned within Tracer through effective progress reporting and open communication lines between different departments.
- Actively pursuing new opportunities for Tracer to grow and achieve beyond the scope of a given project.
- Integrating yourself into the shared culture of Tracer Industries, while helping to strengthen and develop it.

Our Commitment

For those applicants who join Tracer, we offer the following:

- Competitive wage compensation based on experience and qualifications.
- Comprehensive employee benefit package.
- Opportunities for advancement and freedom to choose your career path.

Qualifications

We are looking for team members who have the following qualifications:

- An engineering, technology or commerce degree from an accredited university combined with EPC experience within an industrial or petrochemical field. Electrical and mechanical disciplines preferred.
- 2 years of similar project accounting experience or equivalent.
- Knowledge of heat management systems and general electrical projects would be a definite asset.
- High-level proficiency with Primavera, SAP and MS Excel.
- Excellent organizational and multi-tasking skills.
- Excellent verbal and written communication skills, with the ability to forge effective relationships through all organizational levels.
- The drive and tenacity to exceed performance expectations.
- An open mind, a willingness to participate and the motivation to grow.
